# Agenda

## 1. Characteristics of Japanese Investment in Chile

- Supply – Technology – Quality - Cooperation

## 2. Potential of Japanese Investment in Chile

- Integration of goals

## 3. Investchile Japan services

## 2. Potential

- New market to develop with ambitious commitments to meet towards carbon neutrality
- The supply chain will be “Net Zero” / Regulatory Mandates / Industry Mandates / Pressure for themselves to be Carbon Neutral.
- Real transition projects in existing facilities.
- Traditional financing will somehow tend to be structured with green financing, which has been accelerated by the pandemic as a financing solution that will stimulate subsequent demand.

## 2. Potential

- New market to develop with ambitious commitments to meet towards carbon neutrality
- The supply chain will be “Net Zero” / Regulatory Mandates / Industry Mandates / Pressure for themselves to be Carbon Neutral.
- Real transition projects in existing facilities.
- Traditional financing will somehow tend to be structured with green financing, which has been accelerated by the pandemic as a financing solution that will stimulate subsequent demand.

## 2. Potential: integración of goals

### Assure Supply

- Procure & increase use Of Green H<sub>2</sub> & NH<sub>3</sub> to strengthen National & International Supply Chain.
- Internal promotion of own projects according to NDCs.

### Reduce Emissions

- Clean the internal production matrix of its Carbon Footprint in Chile.
- Promote green H<sub>2</sub> & NH<sub>3</sub> in co-firing and blending on the actual energy matrix of Japan.

### 3. Investchile Japan
