(Should be self-explanatory and clearly indicate the activity leading to GHG emissions reductions / removals)

Date of Submission: dd/mm/yyyy

Partner country: _____

PIN reference number*: _____

(*For the secretariat use only)

The information described in this document may change as the project develops.

1. Description of the project, including how the project reduces/removes GHG emissions

**Please also explain the implementation structure, such as financial structure, money flow of the project, as far as possible.*

2. Reasons and rationale for implementing the project under the JCM

**Please explain why the project participants propose to implement the project under the JCM, instead of a purely commercial project. Please also describe how the proposed project provides any benefits to the partner country, given that the partner country should apply corresponding adjustments for JCM credits acquired by Japan. Please also explain how the project aligns with an eligible/positive list or relevant guidance in the partner country, if applicable.*

3. Location of the project**4. Expected Schedule of the project**

Expected starting date of operation	dd/mm/20yy
Expected schedule up to the starting date of operation.	

5. Type and duration of crediting period

- ☐ Fixed period of 10 years
- ☐ Renewable period of five (5) years, which may be renewed twice at the maximum
- ☐ Other (please specify: _____)

7. Applicable JCM methodology(ies)

☐ Existing methodology(ies) (Please specify)

☐ New methodology(ies) needed (Briefly explain the status below)

8. Expected Mitigation Outcome (GHG emission reductions/removals)

Mitigation Outcome	Amount	Explanatory note <i>Please explain how those numbers are calculated and the reason for allocation.</i>
A. Expected GHG emission reductions/removals against reference emissions* (JCM credits)	tCO ₂ eq/ year (average)	
(optional) Credits acquired by Japanese companies and/or government	%	
(optional) Credits acquired by partner country's companies and/or government <i>These reductions should be reflected in the partner country's GHG inventory</i>	%	
B. (optional) Expected GHG emission reductions/removals against Business-as-usual (BaU) emissions** <i>These reductions, excluding the amount of credits acquired by Japan, should be reflected in the partner country's GHG inventory</i>	tCO ₂ eq/ year (average)	

* The reference emissions are established below BaU, in a manner that a proposed project contributes to the achievement of the NDC of a partner country.

** BaU emissions represent plausible emissions in providing the same outputs or service level of the proposed JCM project in the partner country.
