Annex 1 Evaluation Criteria for Selecting JCM Model Projects in 2023	20
Annex 2 Categorization by applied technology type, Number of JCM model project by each country.....	27
Attachment of Annex 1 Conditions for Adoption by Technology	28

1. Purpose

Japan establishes and implements the Joint Crediting Mechanism (hereinafter referred to as “the JCM”) in order to both appropriately evaluate contributions from Japan to greenhouse gas (GHG) emission reductions or removals in a quantitative manner achieved through the diffusion of decarbonizing technologies, products, systems, services, and infrastructure as well as implementation of mitigation actions in developing and other countries, to use them to achieve Japan’s NDC (Nationally Determined Contribution).

Starting from Mongolia in January 2013, Japan has established the JCM with 25 partner countries (Mongolia, Bangladesh, Ethiopia, Kenya, Maldives, Viet Nam, Lao PDR, Indonesia, Costa Rica, Palau, Cambodia, Mexico, Saudi Arabia, Chile, Myanmar, Thailand, Philippines, Senegal, Tunisia, Azerbaijan, Moldova, Georgia, Sri Lanka, Uzbekistan and Papua New Guinea) as of 6 April 2023.

In order to support the implementation of candidate JCM projects, Ministry of the Environment, Japan (hereinafter referred to as “MOEJ”) has been implementing the “JCM Model Projects (hereinafter referred to as “model project”),” which includes collaboration with projects supported by government-affiliated financial institutions.

The purpose of this model project is to financially support the implementation of projects which reduce GHG emissions by utilizing leading decarbonizing technologies in developing and other countries, and in return, to acquire JCM credits for achievement of Japan’s GHG emission reduction target. Moreover, in accordance with the Decarbonization Infrastructure Initiative (MOEJ in June 2021), the Plan for Global Warming Countermeasures (Cabinet Decision in October 2021), and Implementation of Article 6 following COP26 (MOEJ in November 2021), the Grand Design and Action Plan for a New Form of Capitalism (Cabinet Decision in June 2022), etc., the JCM model project aims to contribute to global GHG emission reductions through the diffusion of leading decarbonizing technologies while considering the needs of the partner countries.

2. Contents

(1) Overview

Participants in the model project shall implement a project to reduce GHG emissions utilizing leading decarbonizing technologies, and also shall conduct measurement, reporting and verification (MRV) of GHG emission reductions. In a JCM partner-country, participants shall conduct the following procedures of their relevant project for the issuance of JCM credits following to 2. (5) Requirements of International Consortium Members.

(a) Application for registration as JCM Project:

Participants shall apply their relevant project to be registered as a JCM project, including developing a Project Design Document (PDD), conducting a local stakeholder consultation

(LSC) as a part of development of PDD, and cooperating with a Third-Party Entity (TPE) which implements validation of their relevant project. In principle, application for registration should be conducted within 1 year from the start of the operation of the facilities/equipment introduced by the project. In order to apply for registration of JCM project, it is necessary to develop an appropriate JCM methodology approved by the Joint Committee. Participants shall develop a JCM methodology by themselves or cooperate with JCM methodologies developers, by providing necessary information for the development of JCM methodology(ies) which is applicable to the relevant project, etc. In the JCM Eco Lease Scheme, participants shall not develop new methodology(ies). In principle, participants can propose a project when already approved or proposed JCM methodology(ies) is available.

(b) Monitoring

Participants shall conduct monitoring to quantitate the effects of the facilities/equipment on GHG emission reductions based on a MRV methodology approved or expected to be approved by the Joint Committee. And participants shall report the results and operation of the facilities/equipment to MOEJ on an annual basis until the end of the legal depreciation period of the facilities/equipment as stipulated by the Japanese law, under the condition that the bilateral JCM documents with the partner countries are effective. Additionally, if there is a period during which the reduction amount cannot be measured due to the responsibility of the participants, that period will be added to the legal depreciation period. Please note that MOEJ may share the results of monitoring with partner country government.

(c) Request for Issuance of JCM Credits

Based on the approved JCM methodology(ies), participants shall request for issuance of JCM credits by using the monitoring results. The issuance includes development of a monitoring report, verification by a TPE, and submission of “JCM Credits Issuance Request” to the JCM Joint Committee. However, this shall not apply in the case that participants are not able to request for issuance due to the bilateral considerations. In principle, the participants shall deliver the JCM Credits issued to the Japanese side to the account of Japanese government. Moreover, in case information related to allocation of credit is stipulated in contracts of the project, it shall not hinder observance of the rules of JCM between Japan and the partner country.

Participants shall request for issuance of JCM credits for emission reductions achieved from the start of commercial operation to the end of the legal depreciation period, under the condition that the bilateral JCM documents are effective, including its extension period. For example, if the expiry of the bilateral JCM documents are extended from 2030 to 2040 and the legal depreciation period ends in that year, participants shall request issuance of JCM credit for emission reductions achieved by 2040.

The first request for credit issuance shall be conducted within 1 year from the registration of

the JCM project in principle (except the situation that the issuance cannot be realized due to the situation of negotiation with the partner countries, etc.). After the first request, participants may request at once for issuance of JCM credits for emission reductions achieved during several years. If necessary, requests for credit issuance may be required to realize before 2030. When the legal depreciation period of the facilities/equipment ends, the request for credit issuance shall be conducted within 1 year.

Additionally if the legal depreciation period of the facilities/equipment ends after 2031, the credit issuance shall be requested in 2031 or earliest timing after 2032 for emission reductions achieved by 2030.

* For Japanese legal depreciation period, please refer to the website below (Japanese only):

<https://elaws.e-gov.go.jp/document?lawid=340M50000040015>

In case of the JCM Eco Lease scheme, the monitoring period is equal to the leasing period, which is at least five years.

* Please note that expenses related to (a) through (c) are not covered by model project. However, if MOEJ recognizes the necessity, the costs may be supported by MOEJ for development of methodologies, Project Design Documents (PDDs) and monitoring reports, and validation/verification.

(2) Eligible Projects

A project eligible for the model project shall satisfy the requirements from (a) to (e) listed below:

- (a) Projects that reduce energy-related CO₂ emissions with leading decarbonizing technologies in the partner countries or developing countries, with which Japan has signed, and that are expected to contribute to achieving Japan's NDC through the JCM;
- (b) Projects contribute to realization of SDGs (Sustainable Development Goals). The installation and operation of the facilities/equipment shall comply with the relevant laws and regulations of the partner country and international practices and guidelines regarding the environmental and human rights protection.
- (c) Reduction of GHG emissions achieved by the projects can be quantitatively calculated and verified.
- (d) Facilities/equipment installed by the projects do not receive any other financial support by the Government of Japan.
- (e) If the technology to be adopted is a technology mentioned in Attachment of Annex 1 "Conditions for Adoption by Technology" in this guideline, the technology shall meet the conditions.

(3) Countries of Priority

Priority will be given to proposals for projects in the partner countries listed below.

25 Partner Countries as of 6 April 2023

Mongolia, Bangladesh, Ethiopia, Kenya, Maldives, Vietnam, Laos, Indonesia, Costa Rica, Palau, Cambodia, Mexico, Saudi Arabia, Chile, Myanmar*2, Thailand, Philippines, Senegal*1, Tunisia*1, Azerbaijan*1, Moldova*1, Georgia*1, Sri Lanka*1, Uzbekistan*1 and Papua New Guinea*1

*1: For those countries that signed MOC in 2022, establishment of the Joint Committee and adoption of JCM rules and guidelines, such as rules of procedures for the JC, rules of implementation, etc., is required before we share the PIN. For information on the Joint Committees of the new partner countries, please refer to the page on the JCM website.

<https://www.jcm.go.jp/>

*2: Selection of project proposals in Myanmar may be withheld depending on the situation of the country at the time of the selection decision.

*3 Regarding solar power generation projects proposed for Thailand, similar projects to those that had been selected in the past will not be selected based on the priorities of the country.

Based on the objective of increasing the number of partner countries to around 30 in accordance with the Grand Design and Action Plan for a New Form of Capitalism (Cabinet Decision in June 2022), proposals for projects in non-partner countries will also be accepted on the basis that their selection will be considered in parallel with the bilateral negotiations for new partnership.

(4) Who Is Eligible to Participate?

A participant that is entitled to request and receive financial support under the model project shall satisfy the requirements (a) to (g) listed below:

- (a) A representative participant of the model project shall be a Japanese entity which is:
 - i. a private company,
 - ii. an independent administrative institution,
 - iii. an incorporated association/foundation, or
 - iv. any organization admitted as appropriate by GEC with approval from MOEJ
- (b) A participant described in (a) shall be the representative entity of an international consortium.

Note 1: International consortium is an association (no legal personality) that consists of a

Japanese entity mentioned in (a) and a foreign entity(ies), etc., with the objective of effectively implementing the project.

Note 2: Application for the model project shall be submitted by the representative participant.

Member(s) of the international consortium other than the representative participant is called as a co-participant(s).

Note 3: Unless GEC approves, the representative participant and a partner participant(s) cannot be changed after the selection of project.

Note 4: The representative participant of the JCM Eco Lease Scheme must be a leaser.

- (c) A participant shall have developed structure for the implementation of the eligible project and have technical capacity to appropriately implement the eligible project;
- (d) A participant shall have a financial basis to bear the costs required to appropriately implement the eligible project;
- (e) A participant shall have adequate management structures and handling capacity for accounting and other administrative work related to the eligible project;
- (f) A participant shall explain the contents, effect on GHG emission reductions, details of the cost, investment plan, etc. of the eligible project;
- (g) A participant shall take a pledge regarding the exclusion of any organized crime groups (*boryokudan* in Japanese).

(5) Requirements of International Consortium Participants

- (a) Japanese entity as a representative participant of an international consortium is responsible for the followings:
 - i. To apply for the model project,
 - ii. To manage the progress in the project, developing the project implementation plan, and acting as the contact entity for accounting and other administrative work related to the project,
 - iii. To introduce the leading decarbonizing technologies,
 - iv. To purchase, install and do commissioning of the facilities/equipment during the construction period, and managing the utilization of facilities/equipment according to the purpose of the model project for the legal depreciation period of the facilities/equipment as stipulated by the Japanese law,
 - v. To return the financial support resulting from violations of the Financing Regulations by any of the co-participants.
- (b) All participants of the international consortium are responsible for the followings:
 - i. To cooperate with JCM methodology developers by providing information required to develop a methodology applicable to the Project for Green House Gas (GHG) emission reductions utilizing the Facilities.

- ii. To cooperate with Third Party Entities (TPEs) by providing materials and information required to efficiently conduct validation of the Project and verification of GHG emission reductions at the project site.
- iii. To reduce, monitor and calculate amount of GHG emission utilizing the Facilities.
- iv. To execute measurement and reporting on the effect of GHG emission reductions by the Facilities, and to report it to the Ministry of the Environment, Japan, annually until the end of the legal depreciation period of the Facilities as stipulated by the Japanese law.
- v. To take necessary actions such as application for the project registration by the Joint Committee set up by the governments of Japan and JCM partner country.
- vi. To request the Joint Committee to issue credits and deliver the issued JCM credit according to the percentage decided by the Ministry of Environment, Japan in principle corresponding to GHG emission reduction achieved by the registered JCM project during the abovementioned legal depreciation period to the Japanese government.
- vii. In case information related to allocation of credit is stipulated in contracts of the Project, it shall not hinder observance of the rules of JCM between Japan and the partner country.
- viii. To manage the Facilities with duty of diligence during the legal depreciation period in order to realize their efficient operation in accordance with the purpose of the Financing Programme even after the completion of the Project.
- ix. To continue the above obligations from (1) through (8), even when changes of the participants are approved.

(6) Notes regarding different Project Schemes;

(a) Responsibility of consortium member who applies for equipment lease.

If a consortium member (lessor) provides equipment lease to another consortium member (lessee), a draft lease contract and details of lease calculation shall be submitted to GEC as a part of application documents to certify that the amount of financial support provided under this program is deducted from the amount of the equipment lease. If its lease period expires before its legal depreciation period expires, the lessor shall maintain the equipment until the end of the legal depreciation period by extending the lease contract or transferring the equipment to lessee.

(b) Cross-border installment sales

If a consortium member sells equipment to the other consortium member through cross-border installment sales. (Note: “Cross-border installment sales” refer to deferred payment sales or installment sales that are carried out across national borders.) If the ownership is transferred from the beginning of the transaction, details of instalments calculation shall be submitted to GEC as a part of application documents to certify that the owner of the equipment who implements the project enjoys the benefit of the financial support by the JCM Model Project. The seller can charge interest for such installment payments. Also, please note the followings:

- i. If a representative participant carries out the installment sale, the party is responsible for the requirements as mentioned in (a) above.
- ii. If an entity other than a representative participant located in Japan or a third country carries out the installment sale, the party needs to be a member of the international consortium, at least until the buyer completes its payments.
- iii. In both i. and ii. above, the basis for calculating the costs covered by financial support is considered as fixed when the seller procures an equipment from a party outside the international consortium.

(c) JCM Eco Lease Scheme

Participants shall submit documents (breakdown of lease fee) to prove that the equivalent amount to the financial support is reduced from the lease contract (draft) submitted with the proposal. Please refer to the outline of JCM Eco Lease Scheme for details.

[jcmsbsdR5_ecolease.pdf \(gec.jp\)](#) (Available in Japanese only)

(7) Costs Covered by Financial Support

The model project covers the following costs. The financial support is limited only to those costs that can be verified as having been spent for implementation of eligible projects. Costs eligible for financial support in the JCM Eco Lease Scheme are limited to a leasing fee of the costs of facilities/equipment and relevant lease interests.

- (a) Cost of main construction work
- (b) Cost of ancillary work
- (c) Cost of machinery and instrument
- (d) Cost of survey and testing
- (e) Cost of facilities/equipment (including monitoring equipment)
- (f) Cost of administrative work; and
- (g) Other necessary costs approved by GEC

[Costs NOT covered by financial support]

The following costs are not covered by the model project:

- (a) Cost to remove existing facilities/equipment (including miscellaneous expenses related to removal costs)
- (b) Equipment and consumable supplies/materials for maintenance of the facilities/equipment installed by the model project, emergency facilities/equipment, safety equipment (such as fire extinguisher, sprinkler, PPE etc.) and security equipment.
- (c) Civil engineering work and construction of building (excluding structures that directly contribute to energy-related CO₂ emission reductions)
- (d) Cost related to a simple restoration of function, such as restoring the function to the state at

- the time of installation by updating existing facilities/equipment
- (e) Spare parts (excluding those used for testing and commissioning)
 - (f) Cost related to on-site inspections and writing reports submitted to GEC as part of the model project
 - (g) Cost of forward exchange contract and remittance charge
 - (h) Cost related to land acquisition

<Exclusion of profits when procuring in-house products>

In model projects, if the financial support targets costs which include expenses related to the procurement of the participants company's own products, etc., it is fine to trade at the market price. However, it is considered as inappropriate for the purpose of financial support to include the benefits of participants in the covered costs. Therefore, when procuring the company's own products, etc. of the participants company, the amount is recorded as “at cost” (manufacturing cost of the procured product, etc.*).

* If it is difficult to calculate the manufacturing cost due to the type of business of the participants company, cost with other reasonable explanations may be acceptable.

(8) Amounts of Financial Support

Total amount of the budget for the model project is expected to be 15 billion Japanese Yen for 3 years. Suggested size of one model project is, within 2 billion yen in terms of the amount of financial support. In principle, a total of 500 million Japanese Yen for three years is suggested for the budget of one model project under JCM Eco Lease Scheme.

Maximum amount of financial support shall be calculated by the total amount of eligible costs multiplied by the percentage listed in (8).

Maximum amount of financial support for the JCM Eco Lease Scheme shall be calculated based on costs of leasing (costs of facilities/equipment and the relevant lease interest) multiplied by the percentage of the financial support, which is 10%.

In addition, actual amount of financial support shall be determined based on the cost which is verified as actually spent for implementation of the project and be indicated in a notice to a representative participant. There is no disbursement prior to the spending of cost.

(9) Maximum Percentage of Financial Support

Maximum percentage of financial support shall be determined according to the number of already selected project(s) using a similar technology in each partner country. Please refer to Annex 2 “Categorization by applied technology type, Number of JCM model project by each country” for actual number of already selected projects.

Number of already selected project(s) using a similar technology in each partner country	Percentage of financial support
None (0)	Up to 50% (determined by GEC)
Up to 3 (1 - 3)	Up to 40% (determined by GEC)
More than 3 (4 and more)	Up to 30% (determined by GEC)

In case of introducing multiple technologies, the upper percentage of financial support is determined for each technology.

The uniform percentage of financial support for the JCM Eco Lease Scheme is 10%.

Maximum amount and percentage of financial support will be determined by the contract of financial support.

(10) Implementation Period of Model Projects

The implementation period of the model projects, precisely the period for installing facilities/equipment and completing all the related payments, shall be between the date indicated on the Notice of Contract of Financial Support and 30 January 2026 in principle. Contract or purchase order prior to or after this period is not covered by the financial support of this model project.

(11) Schedule

Date	Items
Japanese Fiscal Year 2023	
Thursday, 6 April 2023	Announcement of call for proposals (<i>open all year round</i>)
Monday, 15 May 2023	Deadline of submission for the 1st selection of model projects
Tuesday, 16 May 2023	Start of proposal review
Within 4 weeks after the closing of submission	Proposal review Interview with applicants (<i>to be conducted in Tokyo</i>)
The end of June	Sending of Project Idea Note for the JCM Project (PIN) of candidate projects from the JCM Secretariat of Japan to the respective Joint Committees in the partner countries.
	Process related to selection in the Joint Committees.
The 1st selection decision for model projects	Preliminary selection of model projects (<i>based on the evaluation of GEC</i>) Information session for participants of selected projects
Within 30 days after the date of preliminary selection	Submission of application documents for Contract of Financial Support
Within 60 days after the date of	Notice of Contract of Financial Support issued to Japanese

preliminary selection	representative participants (<i>based on the evaluation of GEC</i>) Implementation of model projects
Around Summer	Deadline of submission for the 2nd selection of model projects
	Start of proposal review
Thursday, 30 November 2023	Deadline for submitting proposals (application acceptance may be closed before the deadline, depending on the availability of remaining budget)
End of February 2024	[1-year project] Completion of model projects (<i>including commissioning and payment for the installed equipment</i>)
February - March 2024	[1-year project] <ul style="list-style-type: none"> - Submission of final reports (due by 10 March 2024) - Inspection by GEC (document review and on-site inspection, etc. if necessary) [2- or 3-year projects] <ul style="list-style-type: none"> - Midterm inspection by GEC (document review and on-site inspection, etc. if necessary) - Submission of midterm reports (due by 10 April 2024) (<i>A member of the international consortium must accompany the inspection, particularly the representative participant must accompany</i>)
Japanese Fiscal Year 2024	
April 2024	Disbursement of financial support, for the expenses spent in Fiscal Year 2023 (<i>based on the examination of GEC</i>)
End of February 2025	[2-year project] Completion of model projects (<i>including commissioning and payment for the installed equipment</i>)
February - March 2025	[2-year project] <ul style="list-style-type: none"> - Submission of final reports (due by 10 March 2025) - Inspection by GEC (document review and on-site inspection, etc. if necessary) [3-year projects] <ul style="list-style-type: none"> - Midterm inspection by GEC (document review and on-site inspection, etc. if necessary) - Submission of midterm reports (due by 10 April 2025) (<i>A member of the international consortium must accompany the inspection, particularly the representative participant must accompany</i>)

Japanese Fiscal Year 2025	
April 2025	Disbursement of financial support, for the cost spent in Fiscal Year 2024 (<i>based on the examination of GEC</i>)
End of January 2026	[3-year project] Completion of model projects (<i>including commissioning and payment for the installed equipment</i>)
February - March 2026	[3-year project] <ul style="list-style-type: none"> - Submission of final reports (due by 10 March 2026) - Inspection by GEC (document review and on-site inspection, etc. if necessary) <i>(A member of the international consortium must accompany the inspection, particularly the representative participant must accompany)</i>
March 2026	Disbursement of financial support (<i>based on the examination of GEC</i>)

3. Evaluation and Selection of Proposals

(1) Selection of Model Projects

GEC conducts call for request for proposals and evaluates the submitted proposals according to Annex 1 “Evaluation Criteria for selecting JCM Model Projects” (hereinafter referred to as “Evaluation Criteria”). After the assessment and hearings, in consultation with MOEJ, GEC will select model projects within the budget considering the geographical and technology distribution of the JCM partner countries, among other factors.

(2) Evaluation of Proposals

Firstly, proposals are assessed whether they satisfy all the criteria in “(1). Eligibility Review” of Evaluation Criteria. For those proposals that pass the first round of assessment, GEC will conduct hearings based on the criteria in “(2). Assessment Review” of Evaluation Criteria. Please note that GEC may request additional documents during the evaluation. Interviews will be conducted as necessary after receiving the proposal.

(3) Process related to Selection with Joint Committee of Partner Country

After the proposal review, "PIN (Project Idea Note for the JCM Project)" of prospective projects will be sent to the JCM Secretariat. After the JCM Secretariat verifies that the PIN contains all the required information, the JCM Secretariat sends the PIN to the respective Joint Committees of the partner countries. Joint Committee confirms that there is ‘no objection’ to selecting the concerned projects before deciding to select them by MOEJ. This period may vary from country to country.

Applicants may be referred at any time for further information to respond to any inquiry from the partner countries.

(4) Announcement of Selected Model Projects

GEC will issue a notice to participants of selected model projects, and the information about these selected projects (name of Partner Country and representative participant, title of project, and expected GHG emission reduction, etc.) are publicly posted on MOEJ and GEC's websites.

GEC will also inform participants that their model projects are not selected. Please note that details of evaluation or reasons for not selecting the projects cannot be disclosed.

4. Procedure after Announcement of Selection

(1) Application for Contract of Financial Support

Participants of selected model projects shall submit application documents for Contract of Financial Support between the participants and GEC. If these documents are not fully developed, the application is required to revise or resubmit.

(2) Conclusion of Contract of Financial Support

GEC shall examine the contents of the submitted documents and conclude Contract of Financial Support with the participants when these documents are appropriately completed.

In case the Contract of Financial Support cannot be concluded due to the reasons not attributable to GEC within 60 days after the date of notice of a selected model project or within Japanese fiscal year, GEC possibly cancels the selection of the model project.

Please note that GEC normally takes 30 days for the examination. Hence, participants are recommended to complete their documents within 30 days after the notice of selected model projects.

(3) Points to be Considered for Starting Model Projects

Starting a model project is possible only after the Contract of Financial Support is concluded. Participants should note the following points.

- (a) Regarding the necessary contracts to implement the model project between participants and other entities, the date of concluding contracts must be later than the date of concluding Contract of Financial Support.
- (b) Regarding the abovementioned contracts, participants should select other entities through competition principle as long as it is possible.
- (c) For the abovementioned contracts, payments to other entities should be completed by end of each fiscal year.

(4) Changes in Financial Support and Implementation Plans

1. If participants need to change implementation plans and then financial support due to some reasons, participants need to submit documents applying for the change in financial support and obtain an approval from GEC in advance.
2. Even though there is no changes in financial support, participants shall submit documents applying for the changes described below and obtain the approval from GEC.
 - 1) Modifying the proportion of cost allocated in each category except for changes within 15 % of the lowest cost among categories to be modified.
 - 2) Changing the implementation plan except the following minor changes.
 - a) No changes in the purpose of the project and change to increase efficiency based on creativity by participants
 - b) Minor changes in the implementation plan not related to the purpose and the efficiency of the project
 - c) No changes in the amount of GHG emission reductions and estimation of JCM credits

(5) Expense

For the expenses covered by the model project, participants shall prepare and maintain account books. The books shall separate other expenses that are not covered by the model project, and record amount of income, expense, and its usage, attached with relevant evidence of such income and expense.

If more than one technology is to be installed, or one technology is to be installed at multiple sites, please prepare breakdown of expenses for each technology/site.

The account books and evidences shall be stored for 5 years after the model project is completed.

(6) Reports to be Submitted and its Review

- (a) Reports at the end of each fiscal year

Participants shall submit reports at the end of each fiscal year to GEC, precisely by 10 April.

- (b) Report for completion of model project

Participants shall submit a report for completion of model project within 30 days after the completion of model project, or by 10th March of each year, whichever comes first. All payments by participants to other entities in line with respective contracts shall be completed by the submission of report for completion of model project.

When participants submit a report for completion, they shall complete the payment, according to the construction work, and its result and shall attach its invoice and receipt.

When a report for completion is submitted by participants, GEC conducts a document review and, if necessary, inspection, etc., to confirm whether the results of the project conform to the content of the contract of financial support. When GEC considers that the content is appropriate, GEC determines the amount of financial support to be delivered and inform to

the participants by notification of the amount.

(7) Disbursement of Financial Support

GEC will pay financial support to participants in response to the request submitted by the participants by 30 April of the following Japanese fiscal year after on-site visits for reviewing the requests. Also, when participants request for the intermediate payment, the same process will be conducted for the completed portion of the model project.

The final payment shall be realized to the participants by subtracting the total amount of the intermediate payment from the total amount of financial support. However, if the total amount of the intermediate payment exceeds the total amount of financial support, the excess amount shall be returned.

(8) Management of Acquired Property

Participants shall prepare a property ledger for the acquired property or its gained value through the model project (hereinafter referred to as “property”), in order to properly manage such property and report the status of property to MOEJ on an annual basis. Participants shall achieve GHG emission reductions by utilizing the facilities/equipment after the model project is completed. If the achievement is impossible, participants shall explain the reason in the report. When participants plan to use, sell, exchange, lend, collateralize, dismantle or dispose property (only equipment or facility with a unit value of 500,000 yen or more) for the irrelevant purpose* to the model project, participants shall seek an approval by GEC prior to these actions. Participants shall provide necessary information to MOEJ, if they are requested. When participants plan to collateralize the property, participants shall seek an approval by GEC prior to the action. Please note that such actions may result in return of financial support. In addition, even if the property is dismantled or disposed of upon the approval by GEC, participants shall request credit issuance for the emission reductions achieved before the action is taken, according to the 2(1)(c) of this guidelines.

When participants plan to use, sell, exchange or lend property among members of the international consortium in line with the purpose of the model project, participants shall report to GEC prior to these actions taken for the property.

All of the equipment and facility installed through the model project must attach a sticker showing that they are part of the JCM Model Project by MOEJ.

* Purpose and content of the model project described in the project implementation plan of the application documents and the implementation report of the final report

(9) Changes in Participants of International Consortium

In case the name or address of the participants is changed, or when the participants are merged

with other entities within the legal depreciation period from the completion of the model project, the representative participants shall report the change to GEC without delay.

(10) Cancellation of Contract of Financial Support

If a subsidized project is to be cancelled or discontinued including if a project is not completed within the time frame of JCM Model Project, approval from GEC must be sought. Including such a case, when participants correspond to one of the following actions, GEC can cancel Contract of Financial Support fully or partially. Participants shall return the received financial support in accordance with the Financing Regulations. However, in case of (d), this condition does not apply to the portion of the project that has already been implemented.

- (a) To violate relevant Laws, Financing Regulations, or order by GEC
- (b) To use the financial support for irrelevant purpose to model project
- (c) To act inappropriately
- (d) When it is no longer necessary to continue all or part of the model project due to a natural disaster or other changes in circumstances that occurred after the conclusion of Contract of Financial Support, or when the model project cannot be implemented due to other reasons (except for reasons attributable to participants).

(11) Penalty for Injustice Acts

When false application, receipt of other financial support by the Government of Japan, or any violations to other Laws is identified, Contract of Financial Support may be cancelled and/or return of financial support may be ordered.

5. Submission of Proposals

(1) How to Submit Proposals

Proposals must be submitted electronically. Proposals submitted by postal mail will be rejected in principle. Proposals must be pre-registered in advance. Pre-registration must be completed at least two weeks before the proposal deadline. Proposals must be written in Japanese.

To submit proposals electronically, Electronic Application Account is required. Please apply using the Account Application Form. Application process is as follows.

- (a) Pre-registration of proposals on GEC website is required from this fiscal year.
- (b) Please apply for an Electronic Application Account using the Account Application Form on our website.
- (c) Account information and login instructions will be sent to applicants once the Account is issued.
- (d) Please login to the Electronic Application System using the Account information and submit

- proposals electronically. Please enter necessary information on the Electronic Application page. Documents to submit are to be stored in the cloud storage exclusive for the application.
- (e) Once proposals have been submitted by clicking the Apply button, applicants will no longer be able to edit.
 - (f) GEC will notify applicants after proposals have been submitted successfully.

(2) Period for Submission of Proposals

From Thursday, 6 April 2023 to Thursday, 30 November 2023 (12:00 JST)

- * Application is open all year round. Its acceptance may be closed before the deadline, depending on the availability of remaining budget.
- * Deadline of submission for the 1st selection of model projects is Monday, 15 May 2023 (12:00 JST).
- * Deadline of submission for the 2nd selection of model projects is Friday, 14 July 2023 (12:00 JST).

(3) Documents to be Submitted

Following documents must be included in a proposal. If a format is specified, please download the format from our website of this call for proposals (available only in Japanese). (c) and (e) can be created by entering necessary information on the Electronic Application page. Other documents should be submitted as attachments.

- (a) Form No.1 Application Form
- (b) Form No.2 Declaration by Representative Participant
- (c) Form No.3-0a Project Implementation Plan **【Input data on the Electronic Application page】**
 - * Please write within ten (10) pages. Supporting documents must be included according to the Checklist (Form No. 6).
- (d) Form No.3-16 PIN (Project Idea Note for the JCM Project)
 - * After the proposal review, "PIN (Project Idea Note for the JCM Project)" of prospective projects will be sent to the JCM Secretariat. After the JCM Secretariat verifies that the PIN contains all the required information, the JCM Secretariat sends the PIN to the respective Joint Committees of the partner countries. Joint Committee confirms that there is 'no objection' to selecting the concerned projects before deciding to select them by MOEJ. This period may vary from country to country. Applicants may be referred at any time for further information to respond to any enquiry from the partner countries.
- (e) Form No.4 Expenses breakdown (including supporting documents, such as quotations of the budget) **【Input data on the Electronic Application page】**
- (f) Company information (such as company brochure) and articles of incorporation of both representative participant and co-participant(s)

* If the company is not established yet at the timing of application, participants need to submit drafts of articles of incorporation for the company which was already approved or will be approved in the future. However, it is necessary for participants to submit documents to show the description of the business in case that drafts are not prepared yet.

- (g) Financial statement of both representative participant and co-participant(s) (audited one for the latest 3 consecutive years)
- (h) International Consortium Agreement
Draft document of International Consortium Agreement and status toward signing the agreement. Signed agreement must be submitted at the timing of applying for Contract of Financial Support.
- (i) Form No.5 Agreement on the Allocation of JCM Credits
* Signed agreement must be submitted.
- (j) Form No.6 Checklist for Submission of Proposal
- (k) Other supporting documents

* Attached documents should be saved in numerical order with a file name according to the number of Checklist [Form 6].

In addition, during the evaluation process, applicants may be contacted by phone or e-mail if necessary. In that case, additional documents may be required to submit.

(4) Remarks

Please note the following points for submitting application.

- (a) Please submit the application electronically. The deadline is noon (12:00 JST) of each closing date of submission.
- (b) Call for proposals will end when the amount of financial support for the selected projects reaches the budget limit, so please submit the application promptly regardless of the deadline.
- (c) Before submitting the application in complete form, please check by different persons, according to the checklist [Form 6].
- (d) For documents written in a language other than English, it may complicate the examination if Japanese translation is not attached. Please attach Japanese translation to documents. For English documents, we may request for Japanese translation after receiving the application.
- (e) Since the application guidelines for this time have changed from the previous time of the application, even applicants who have applied in the past shall read this guideline and related documents carefully.
- (f) In principle, participants cannot change the application once submitted.
- (g) Proposal information submitted is used only for selection of projects.

(5) Pre-registration Form

<https://gec.jp/jcm/jp/pre-registration/>

(6) Account Application Form

Please find Account Application Form on our website:

<https://gec.jp/jcm/jp/apply/> (Japanese only)

(7) Information Session

The information session on submission of proposals will be held and streamed online on Friday, 7 April 2023.

(8) Questions and Answers

➤ Reception method

Questions can be sent via e-mail: jcm-info@gec.jp. The subject of the e-mail should be "Question: Call for Proposals for JCM Model Projects in 2023".

➤ Reception period

Until 17:00 on Friday, 14 April 2023

➤ Answer

It will be posted on GEC's web page approximately 1 week after the reception period ends.

6. Treatment of Information

Documents including accounting documents and supporting documents (e.g. invoices, contracts, proof of payments) etc. and electronic data of these documents submitted to GEC in accordance with this Guidelines and Financing Regulations are treated with due care of prudent manager and used only for: evaluation of proposals; conclusion of Contract of Financial Support; and determination of amount of financial support.

7. Note

(1) Presentations of Model Projects

MOEJ will disseminate information of the overviews and results of the model projects to the world. Therefore, GEC will ask participants to share their photographs of facilities/equipment installed by the model projects which can be introduced to the public. Additionally, participants are encouraged to present their projects publicly by themselves, and participants should explain that the projects are implemented as JCM Model Projects funded by MOEJ.

(2) Other

In addition to this Guidelines, participants of the model project shall conform to the Act on the Regulation of Execution of Budgets Pertaining to Subsidies, etc. (Act No. 179 of 1955), the Order for Enforcement of said Act (Order No.255 of 1955), and Financing Regulations.

Please also refer to the JCM Model Project - Gender Guidelines.

http://gec.jp/jcm/jp/kobo/r02/mp/jcmsbsdR2_gender_en.pdf

Annex 1 Evaluation Criteria for Selecting JCM Model Projects in 2023

(Tentative translation)

April 2023
Global Environment Centre Foundation

1. INTRODUCTION

Based on No. 3 (6) of "Implementation Guidelines of Financial Support Project for Joint Crediting Mechanism" (hereinafter referred to as "Implementation Guidelines"), in order to select JCM Model Projects (hereinafter referred to as "model projects") in fair and transparent way, the Global Environment Centre Foundation (GEC) organized an external committee and established this evaluation criteria, which was approved by the committee.

Based on this set of criteria, GEC will consult with the Ministry of the Environment, Japan, and select model projects with consideration of technological distributions etc., after confirming that there is 'no objection' raised by the Joint Committee of respective partner countries regarding the selection of the projects.

2. PURPOSE OF MODEL PROJECT

The purpose of model projects is to financially support parts of the implementation costs of projects (including collaboration with projects supported by the Japan International Cooperation Agency (JICA) or other institutions including government-affiliated financial institutions) which reduce GHG emissions in the partner countries by utilizing advanced technologies of such private sectors including leading decarbonizing technologies, and in return seeks to acquire JCM credits for achievement of Japan's GHG emission reduction target (Nationally Determined Contribution: NDC). Moreover, along with the Decarbonization Infrastructure Initiative (MOEJ in June 2021), the Plan for Global Warming Countermeasures (Cabinet Decision in October 2021) and Implementation of Article 6 following COP26 (MOEJ in November 2021), and the Grand Design and Action Plan for a New Form of Capitalism (Cabinet Decision in June 2022) etc., the JCM model projects aim to contribute to global GHG emission reductions, through the diffusion of leading decarbonizing technologies while considering the needs of the partner countries. Priority will be given to proposals for projects in the partner countries listed below.

25 Partner Countries as of 6 April 2023

Mongolia, Bangladesh, Ethiopia, Kenya, Maldives, Vietnam, Laos, Indonesia,

Costa Rica, Palau, Cambodia, Mexico, Saudi Arabia, Chile, Myanmar*2, Thailand, Philippines, Senegal*1, Tunisia*1, Azerbaijan*1, Moldova*1, Georgia*1, Sri Lanka*1, Uzbekistan*1 and Papua New Guinea*1

*1: For new partner countries, signed after 2022, process related to selection with the Joint Committee of the partner country will start as soon as the Joint Committee as well as its rules of procedures and relevant guidelines are ready. For information on the Joint Committees of the new partner countries, please refer to the page on the JCM website.

<https://www.jcm.go.jp/>

*2: Selection of project proposals in Myanmar may be withheld depending on the situation of the country at the time of the selection decision.

*3 Regarding solar power generation projects proposed for Thailand, similar projects to those that had been selected in the past will not be selected based on the priorities of the country.

Based on the objective of increasing the number of partner countries to around 30 in accordance with the Grand Design and Action Plan for a New Form of Capitalism (Cabinet Decision in June 2022), proposals for projects in non-partner countries will also be accepted on the basis that their selection will be considered in parallel with the bilateral negotiations for new partnership.

Additionally, projects that demonstrate the certainty of business development after the completion of the Program to Demonstrate Decarbonizing Technology for Realizing Co-Innovation and its predecessor program may receive preferential treatment.

3. OVERVIEW OF CRITERIA

Proposals for model projects will be reviewed based on the following criteria. (2) Assessment Review is conducted for applicants who satisfy all the eligibility criteria of (1) Eligibility Review.

(1) Eligibility Review

A proposal will be reviewed whether it meets the following eligibility criteria. When all these eligibility criteria are met, the proposal will proceed to the “(2). Assessment Review.” If any of these eligibility criteria are not met, the application will be rejected.

- 1) Does the applicant meet the criteria for an eligible participant?
The applicant shall meet 2. (4) in the “Guidelines for Submitting Proposals”.
- 2) Is the model project expected to reduce/ remove emissions of GHG including energy-related CO₂ and contribute to achieving Japan’s NDC through JCM?
 - The model project should be consistent with the climate change policies of partner countries where projects are implemented.
 - The technology applied in the project shall reduce emissions of GHG including energy-related CO₂ (amount of emission reductions/ removal can be quantitatively calculated, the emission reductions is not the result of decreased activities, such as lower production, and the emission reductions/ removal from the project can be clearly separated from the reductions/removal by other factors that may influence the emissions).
 - No objections have been expressed by the partner and other related stakeholders in terms of GHG emission reductions/removal from the implementation of the project will be credited and allocated in accordance with the JCM regulations.
- 3) Does the financial support promote investment in projects* with leading decarbonizing technologies by private companies and others?
* In principle, it should not be a business related to thermal power generation using fossil fuels, except for equipment that effectively utilizes the heat generated during power generation and equipment that contributes to decarbonization such as carbon capture and storage (CCS).
- 4) Can the applicant objectively show the superiority of the decarbonizing technologies implemented through the model project? This means:
 - Evidence of their superiority, such as data or literature, should be available, or if there is data that demonstrates their high performance in energy saving standards, etc.
 - If the technology to be adopted is a technology mentioned in Attachment of Annex 1 “Conditions for Adoption by Technology” in this guideline, the technology shall meet the specified conditions.
- 5) Are the decarbonizing technologies internationally in practical use and can be introduced in the partner and other countries? This means:
 - The technologies should be realized in other project(s) (a track record of commercial operation or demonstration project etc. will be reviewed), or the facilities/equipment

using the technology should be commercially manufactured (Catalogues, specification etc. will be reviewed).

- Are equipment maintenance technologies and local support available in the partner and other countries?
- 6) Is there marketability and high potential that the decarbonizing technologies to be introduced will be diffused in the partner country or other countries where they are not currently sufficiently widespread? Also, is there a concrete strategy for the self-sustaining diffusion of the technology in the country, which will lead to its diffusion on a commercial basis in the future?
- 7) Are GHG emission reduction calculation methodologies and monitoring methods appropriate?
- In case the model project is going to introduce a technology that is similar to what was implemented in the past, does the project meet the eligibility criteria of approved JCM methodologies for the similar technology of the partner and other countries in which the project will be implemented? If there is no methodology approved by JCM, is the reference emission amount and project emission amount calculated conservatively?
 - The monitoring method and implementation organization required to calculate GHG emission reductions are appropriate.
- 8) Are the expenses for the model project appropriately estimated?
- The expenses should be estimated using the same or similar project implemented in the past; or the expense should be based on the actual design and specification.
 - The evidence for estimation of personnel expense and travel cost is clear and appropriate.
- 9) Is the model project consistent with the Decarbonization Infrastructure Initiatives (MOEJ in June 2021), the Plan for Global Warming Countermeasures (Cabinet Decision in October 2021) and Implementation of Article 6 following COP26 (MOEJ in November 2021), etc.,?
- 10) Does the model project adhere to the environmental and social legal system requirement?
- The installation and operation of the facilities/equipment shall comply with the environmental laws and regulations of the partner country and refer to international practices and guidelines regarding the environmental protection (air pollution, water contamination, waste treatment, noise/vibration, ecosystem etc.).

11) Does it contribute to realization of SDGs (Sustainable Development Goals)?

It contributes to sustainable development and the realization of SDGs (*) and it complies with the gender guidelines.

http://gec.jp/jcm/jp/kobo/r02/mp/jcmsbsdR2_gender_en.pdf

* International goals from 2016 to 2030 described in the "2030 Agenda for Sustainable Development" adopted at the United Nations Summit in September 2015

12) Is the company taking the best possible measures to respect human rights (introduction of human rights due diligence process, dialogue with stakeholders, etc.) under its own responsibility in accordance with the Action Plan on Business and Human Rights (2020-2025) (the Inter-Ministerial Committee for Japan's National Action Plan on Business and Human Rights, October 2020) (see URL below)?

<https://www.mofa.go.jp/files/100173319.pdf>

In addition, in accordance with the Guidelines on Respecting Human Rights in Responsible Supply Chains (The Inter-Ministerial Committee on Policy Promotion for the Implementation of Japan's National Action Plan on Business and Human Rights, September 2022) (see URL below), are companies taking the best possible human rights measures in their supply chains (introduction of human rights due diligence processes, dialogue with stakeholders, etc.) under their own responsibility?

https://www.meti.go.jp/english/press/2022/pdf/0913_001a.pdf

13) If the model project is implemented in collaboration with other project that JICA or other institutions including government-affiliated financial institutions provides equity or loan, can the applicant draw a clear line between the part covered by this financial support (applicable to the extent) and the part covered by ODA under projects of JICA or government-affiliated financial institutions?

14) The facilities/equipment introduced by the model project shall not receive any other financial support from the Government of Japan.

(2) Assessment Review

A) After passing the eligibility review, the proposal will be reviewed and scored using the following assessment criteria. Robustness of the project implementation (20 points)

- 1) Management and operational capacities of a representative participant and co-participant(s) to implement the project (10 points)

- 2) Status of the project implementation structure (including the decision on roles of each entity in the international consortium) (10 points)

B) Business Certainty (30 points)

- 1) Appropriateness of the project plan (including the schedule, decisions for the project location, concession and license for the project implementation, and status of concluding a Power Purchase Agreement in case of a power generation project). When projects require participants to participate in bidding to obtain the right of project implementation, effects by the financial support of the model project and the schedule for bidding must be submitted. (10 points)
- 2) Profitability of the project, including economic performance, forecast of cash flow and payback period (For a tentative indicator, the payback period is preferred to be 3 years or longer with the financial support.) (10 points)
- 3) Appropriateness of financial plan (The amount of investment by each entity is clearly stated, including the certainty of financial arrangement.) (10 points)

C) Total emission reductions of GHGs (including energy-related CO₂) and its certainty (25 points)

Total emission reductions [tCO₂eq]

= GHG emission reductions per year [tCO₂eq/y] × legal depreciation period of the facilities/equipment as stipulated in the Japanese law [y]

Total amount of GHG emission reductions and its certainty is assessed comprehensively, also taking into account the following.

- (i) Operation and maintenance management system of the introduced facility and monitoring implementation system.
- (ii) Risks during the MRV implementation period (after the facility is in operation) and how they are addressed.

D) Cost-effectiveness of emission reductions of GHGs in terms of financial support and its certainty (25 points)

Cost-effectiveness for GHG emission reductions [JPY/ tCO₂eq]

= Amount of financial support [JPY] / Total emission reductions of GHGs [tCO₂eq]

Cost-effectiveness of financial support and its certainty to reduce 1 ton of GHG emissions will be evaluated. Cost-effectiveness of GHG emission reductions should be 4,000 JPY/tCO₂eq or lower. However, if the number of similar technological projects in a partner country is 5 or more in Annex 2 “Categorization by applied technology type,

Number of JCM model project by each country”, its cost-effectiveness is expected to be 3,000 JPY/tCO₂eq or lower (Solar power projects in Mongolia, Indonesia, Palau and the Philippines and chiller for air conditioning projects in Vietnam, Indonesia and Thailand). If the number of similar technological projects in a partner country is 10 or more, the cost effectiveness is expected to be 2,500 JPY/tCO₂eq or lower (Solar power projects in Vietnam and Chile, as well as Hydropower projects in Indonesia). If the number of similar technological projects in a partner country is 20 or more, the cost effectiveness is expected to be 2,000 JPY/tCO₂eq or lower. In principle, the cost effectiveness for a solar power project is 2,500JPY/tCO₂eq, and for a hydropower project it is 500JPY/tCO₂eq.

Please refer to the relevant Japanese law for the legal depreciation period. However, in case of the JCM Eco Lease scheme, monitoring period is equal to the lease period of the project.

E) Additional points (10 points)

- Projects that completed the Program to Demonstrate Decarbonizing Technology for Realizing Co-Innovation and its predecessor program.
- Projects that introduce following leading decarbonizing technologies that are among the focus areas for JCM according to the Infrastructure Initiative for Decarbonization (MOEJ in June 2021) (*Excluding countries that have already introduced or are introducing these technologies as JCM Model Projects):
 - 1) Renewable Energies (Solar Power, Wind Power, Hydropower, Geothermal Energy, Biomass Energy, Green Hydrogen, etc.)
 - 2) Green Logistics including Cold Chain (Non-Fluorocarbon Cooling System, Modal Shift, Airports, Ports and Harbors, etc.)
 - 3) Waste management Infrastructure (Waste to Energy, etc.)

* * *

Annex 2 Categorization by applied technology type, Number of JCM model project by each country

(As of 6 April 2023)

If one JCM model project applies several technologies, the numbers are counted for each technology.

Percentage of Financial Support : White 0 project = Up to 50% Yellow 1-3 project(s) = Up to 40% Orange more than 4 projects = Up to 30%

Sector	Technology	JCM Methodology	Mongolia	Bangladesh	Ethiopia	Kenya	Maldives	Viet Nam	Lao PDR	Indonesia	Costa Rica	Palau	Cambodia	Mexico	Saudi Arabia	Chile	Myanmar	Thailand	Philippines

Attachment of Annex 1 Conditions for Adoption by Technology

1. Solar Power Plant

The conversion rate from optical to electric energy of photovoltaic modules must be 21% or higher.

*Except for particular technologies such as installation of building-material integrated photovoltaic modules.

2. Solar Power Plant with Battery

All the following conditions must be met.

➤ Photovoltaic module

The efficiency of photovoltaic modules must be 21% or higher.

*Except for particular technologies such as installation of building-material integrated photovoltaic modules.

➤ Battery

(1) A battery charges only the power generated by photovoltaic modules to be introduced, and the amount of power supplied from the battery can be measured.

(2) Regarding the installation necessity of a battery, one of the following requirements must be met.

1) Installation at off-the-grid areas

2) In case of supplying the generated power to grid, the installation of storage batteries is in line with the partner country's energy policy, or that the installation of storage batteries is included in the relevant authorities' required specifications and that it is reasonable.

However, the capacity of the storage batteries shall be at least 20% of the power capacity of the PV modules during the generation hours.

3) All of the followings must be met for the self-consumption in the factory or the local power supply business.

(a) In principle, the battery should be charged and discharged every day.

(b) The battery capacity is 20% or larger than the wattage of photovoltaic modules installed and within the maximum daily chargeable amount of generated power.
